

# Sustainability Report 2024

Prepared by: GreenFuture Corp.  
Date: December 2024

# 1. Introduction

GreenFuture Corp. is committed to building a sustainable future by reducing environmental impact, supporting communities, and driving innovation in clean technology. This report provides an overview of our 2024 sustainability initiatives and outcomes.

## 2. Energy & Emissions

We continue to transition to renewable energy sources across our global operations. In 2024, 68% of our electricity came from renewable sources, reducing our carbon footprint significantly.

Year	Renewable Energy (%)	Carbon Emissions (MT CO2e)
2022	45%	120,000
2023	55%	100,000
2024	68%	80,000

### 3. Waste & Recycling

Our zero-waste initiative focuses on circular economy practices. We achieved a 72% recycling rate in 2024, up from 60% in 2023.

Year	Recycling Rate (%)	Landfill Waste (tons)
2022	50%	12,000
2023	60%	9,000
2024	72%	6,500

## **4. Water Management**

Water conservation remains a critical priority. Through efficiency upgrades and rainwater harvesting, we reduced water withdrawal by 18% compared to 2023.

## 5. Community & CSR

In 2024, GreenFuture Corp. invested \$15 million in community development programs, focusing on education, healthcare, and clean drinking water access. Employee volunteer hours reached 120,000 globally.

## 6. Future Outlook

Looking ahead to 2025, we aim to achieve 80% renewable energy usage, a further 20% reduction in carbon emissions, and expand our CSR initiatives to new regions.
